

Whiskey Barrel Rack®

Tired of filling a planter with a ton of dirt, then not being able to move it because it's gotten too heavy? The Whiskey Barrel Rack® is a lighter, more portable and economical alternative because it uses 2/3 less soil than conventional planters. Its sturdy, rugged construction allows you to move your plants indoors during inclement weather, or leave it out all year long. Brighten your winter with plastic foliage displays, use it for a birdbath, or fill it with sand for smokers to extinguish their cigarettes. The Whiskey Barrel Rack® is so versatile and it's stackable for easy storage.
